

Plans vasques PMR 2023

## Dossier technique plans vasques PMR

Matière composite thermo moulée alliant une forte teneur en carbonate de calcium à une résine synthétique, d'un poids semblable à celui de la pierre.

Ce produit ne possède ni joint ni soudage à froid permettant ainsi d'éviter les foyers de développement bactériologiques. L'intégralité de la vasque est recouverte d'un gelcoat permettant une isolation sanitaire.

Hygiénique, il est approprié aux usages sanitaires, ne tâche pas et résiste à l'action des principales bases et acides courants et à tout produit d'entretien.

Résistance aux chocs supérieure à celle de la porcelaine vitrifiée et au marbre naturel.

Grande résistance aux chocs, aux différents acides et agents détergents, utilisez au choix des produits d'entretien du commerce réservés à cet usage, hormis les abrasifs métalliques.

Adaptabilité des modèles angle, droit simple et double pour les collectivités EHPAD hôpitaux et cliniques.

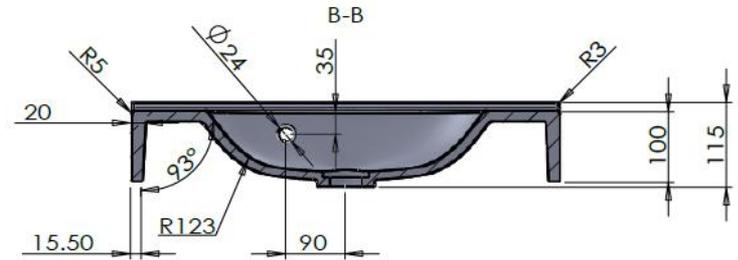

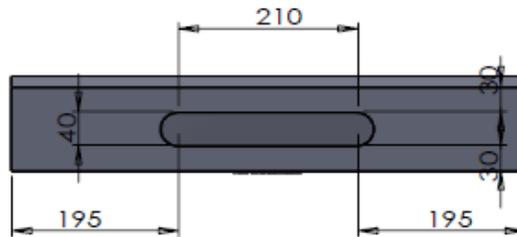

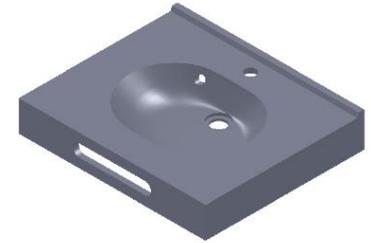

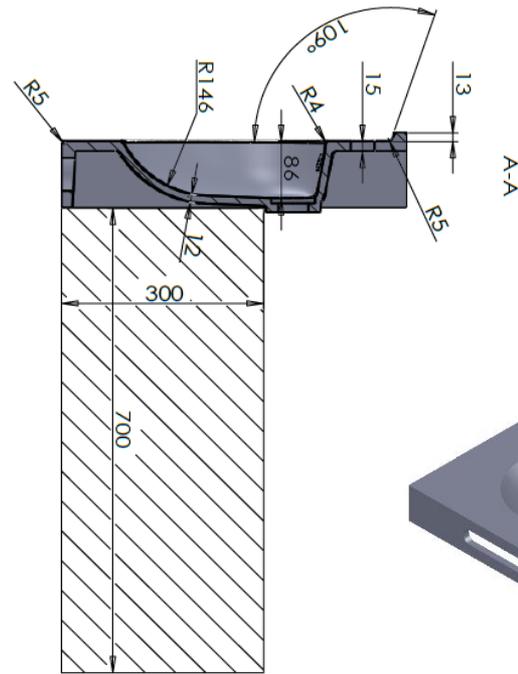

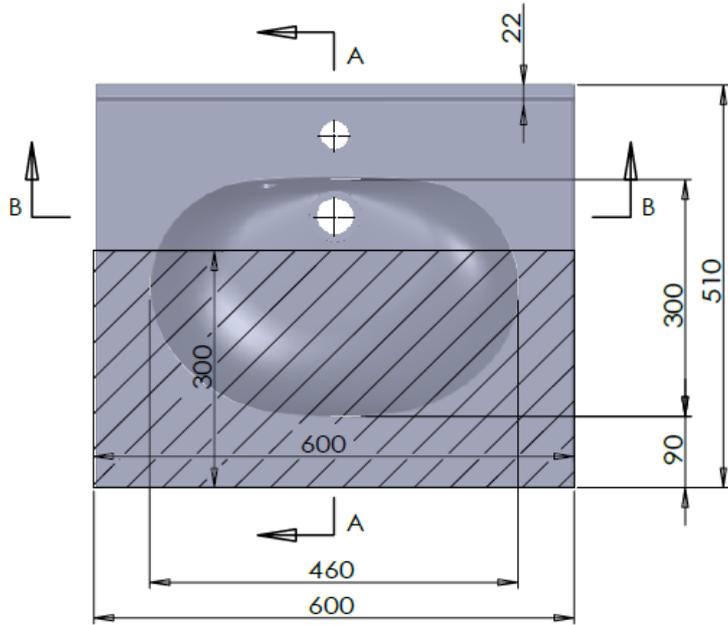

En annexe l'avis technique attestant de la conformité des modèles vis-à-vis de l'accessibilité des personnes handicapées.

Principe de fixation :

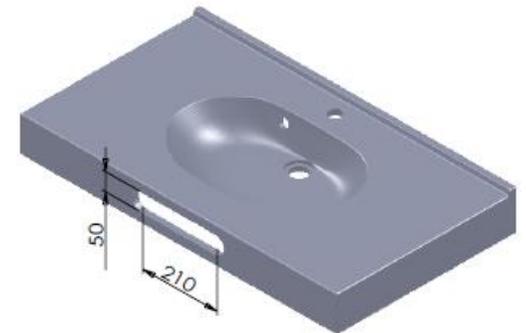

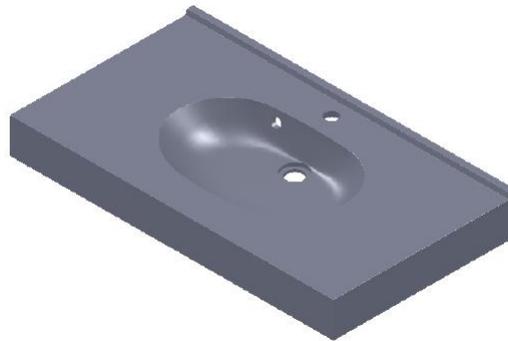

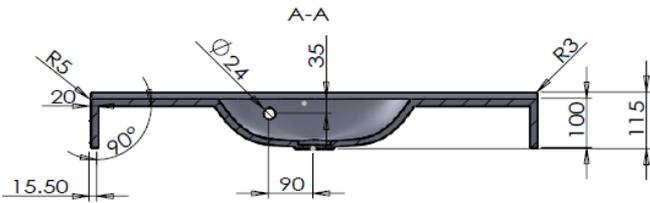

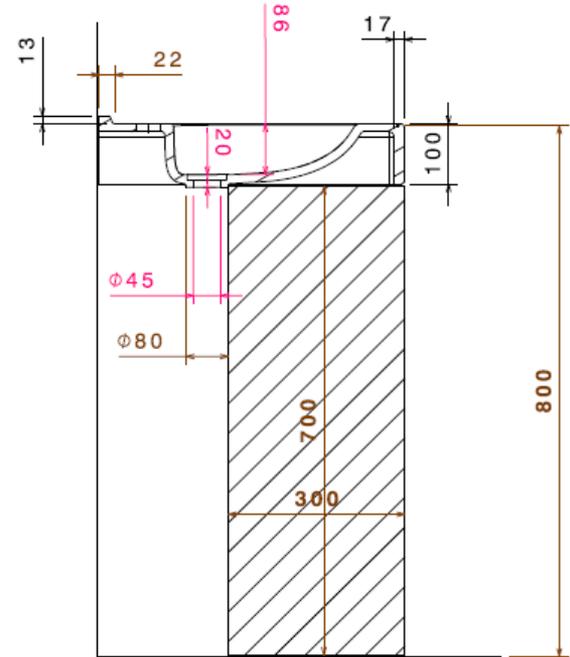

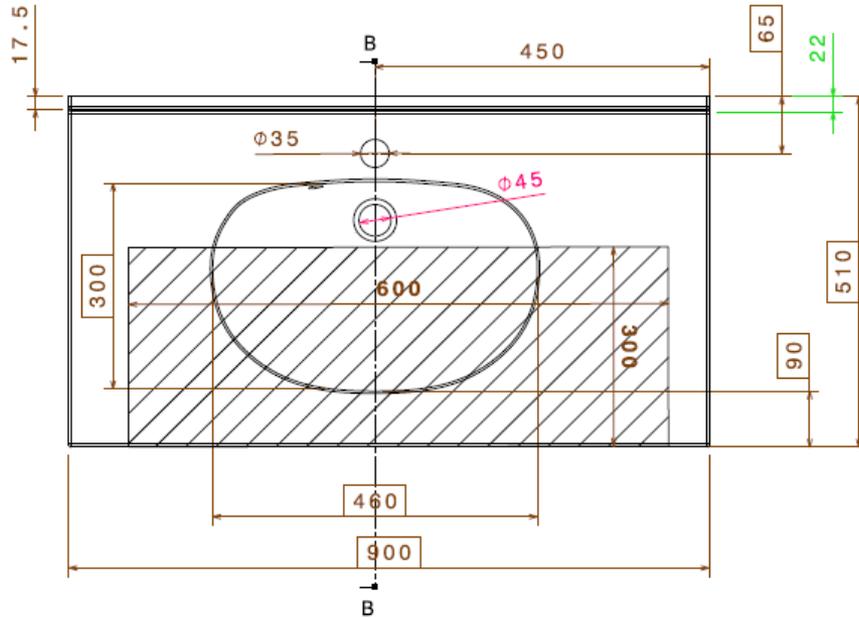

Equerres pour les plans droits Florence, Cornières aluminium pour les plans d'angle Toscane

Profilé métallique en L, vissé et collé
